

RICARDO ROJAS CARVAJAL

Cochabamba, Bolivia • ricardo.rojas.carvajal@gmail.com • +591 69509997

Junior Full Stack Developer with experience building web applications. ICPC Regional Contestant with a strong background in algorithms. Experienced in Agile environments (Scrum, Nexus, XP) and collaborative development.

EDUCATION

Universidad Mayor de San Simón

Computer Science.

Cochabamba, Bolivia

Expected December 2026

Key Achievement: ICPC Regional Contestant (2025)

Universidad Mayor de San Simón

Electrical Engineering.

Cochabamba, Bolivia

October 2020

Key Achievement: Awarded Academic Excellence.

Centro Boliviano Americano

High Intermediate English Program.

Cochabamba, Bolivia

February 2020

EXPERIENCE

Freelance Dev - Under NDA (Full stack)

February - May 2026

- Developed REST API with Express, Prisma, PostgreSQL with Zod validation.
- Developed SPA with Vue 3, Pinia and Vue Router.
- API key integration for external systems.

TuCasa - Real Estate Platform (Full stack)

August – November 2025

- Developed REST API with Spring Boot and integrated Google Maps API for geolocation features.
- Actively contributed to the integration team using the Nexus Framework to ensure product cohesion.

PyLearn - Learning Platform (Full stack)

February – July 2025

- Built full stack application with Angular for the UI, API with Go and managed data persistence with PostgreSQL.
- Applied XP practices and Pair Programming to enhance code quality and facilitate knowledge sharing across the team.

LEADERSHIP AND INVOLVEMENT

Grupo Scout Anglo Americano

Volunteer Leader

Cochabamba, Bolivia

July 2022 – December 2025

- Coordinated activities for youth groups, fostering teamwork and the development of social skills.
- Collaboratively planned and executed group camping activities.

ICPC Regional Programming Contest
Contestant

September – 2025

- Competed in a team-based competitive programming contest, solving algorithmic problems under time constraints.

Tech4Future Hackathon
Participant

February – 2026

- Within a team of 4 people we built an AI based software to recognize skin issues, allowing the user to upload multiple pictures to evaluate the progression of the symptom.

BYTE BACK Hackathon
Second place

March – 2025

- Within a team of 4 people we built a browser extension to detect hostile intentions using AI models within the browser.

SKILLS AND INTERESTS

Technical Skills:

- Programming languages: Java, Python, C++, JavaScript, Go.
- Frontend: React, Angular, Vue.
- Backend: ExpressJs, Spring Boot.
- Databases: PostgreSQL, Supabase.
- Tools: Git, Docker.

Languages: Spanish (Native), English (B2).

Interests: Competitive programming, algorithms, languages, fitness.
